Contents

Marine Chemistry, Vol. 33 (1991)

Research Papers

Automated determination of amino acids in seawater
A. Wenck, L. Mintrop and J.C. Duinker (Kiel, FRG) 1

Photo-induced degradation of tracer phenols added to marine surface microlayers
K. Lin and D.J. Carlson (Corvallis, OR, USA) 9

A chemical method for estimating the availability of iron to photoplankton in seawater
M.L. Wells, L.M. Mayer (Walpole, ME, USA) and R.R.L. Guillard (Boothbay Harbor, ME, USA) 23

Remobilization of Cu from marine particulate organic matter and from sewage
A.J. Paulson, H.C. Curl, Jr. and E.D. Cokelet (Seattle, WA, USA) 41

Analytical phosphorus fractionation of sediment trap material
G. Liebezeit (Hamburg, FRG) 61

Voltammetric determination of the complexation parameters of zinc in marine and estuarine waters
F.L.L. Muller and D.R. Kester (Narragansett, RI, USA) 71

Fluorescent humic acid bands in coral skeletons originate from terrestrial runoff
M. Susic, K. Boto and P. Isdale (Townsville, Qld., Australia) 91

Copper complexation during a bloom of *Gymnodinium sanguineum* Hirasaka (Dinophyceae) measured by ASV
M.S. Robinson and L.N. Brown (Victoria, B.C., Canada) 105

Determining resolution for $^{87}Sr/^{86}Sr$ profiles in marine sediments
J.L. Carroll and I. Lerche (Columbia, SC, USA) 119

The distribution of dissolved cadmium, lead and copper in the Bristol Channel and the outer Severn estuary
D.J. Harper (Burnham-on-Crouch, UK) 131

Zinc budget in the Mediterranean Sea: a hypothesis for non-steady-state behavior
D.P. Ruiz-Pino, E. Nicolas, J.P. Béthoux (Villefranche-sur-Mer, France) and C.E. Lambert (Gif-sur-Yvette, France) 145

Measurement of the different forms of zinc in Narragansett Bay water based on the rate of uptake by a chelating resin
F.L.L. Muller and D.R. Kester (Narragansett, RI, USA) 171

Bromoform in the Nansen Basin in the Arctic Ocean
M. Krysell (Göteborg, Sweden) 187

Book Review

Chemical oceanography 199

Research Papers

Uptake of Fe(II) and Mn(II) on chitin as a model organic phase
D.J. Hawke, S. Sotolongo and F.J. Millero (Miami, FL, USA) 201

Production and turnover rates of fatty acids in marine particulate matter through phytoplankton photosynthesis
T. Hama (Nagoya, Japan) 213

Aggregate formation of humic acids from marine sediments
N. Shinozuka and C. Lee (Tokyo, Japan) 229
Dissolved combined amino acids in marine waters as determined by a vapor-phase hydrolysis method
R.G. Keil and D.L. Kirchman (Lewes, DE, USA) 243
Trace metal distributions at an Arctic Ocean ice island
P.A. Yeats (Dartmouth, N.S., Canada) and S. Westerlund (Goteborg, Sweden) 261
Phosphorus–cadmium cycling in the northeast Tasman Sea, 35–40°S
K.A. Hunter and F.W.T. Ho (Dunedin, New Zealand) 279

Book Review
Pollution of the North Sea
H. Elderfield (Cambridge, UK) 299

Research Papers
(Laser-excited) Shpol'skii fluorometry: applications in marine environmental analysis of polynuclear aromatic hydrocarbons
J.W. Hofstraat, W.J.M. van Zeijl (The Hague, Netherlands), F. Ariese, J.W.G. Mastenbroek, C. Gooijer and N.H. Velthorst (Amsterdam, Netherlands) 301
Determination of aqueous dimethyl sulfide using isotope dilution gas chromatography/mass spectrometry
R.G. Ridgeway Jr., A.R. Bandy and D.C. Thornton (Philadelphia, PA, USA) 321
Method for determining stable isotope ratios of dissolved organic carbon in interstitial and other natural marine waters
J.E. Bauer (La Jolla, CA, USA), R.I. Haddad (Brea, CA, USA) and D.J. Des Marais (Moffett Field, CA, USA) 335
Subsampling errors in active chlorophyll *a* determination in water samples
L.I. Heileman and A. Mohammed (Chaguramas, Trinidad and Tobago) 353
Trace element distributions in coastal waters along the US-Mexican boundary: relative contributions of natural processes vs. anthropogenic inputs
S.A. Sañudo Wilhelmy and A.R. Flegal (Santa Cruz, CA, USA) 371
